## AUDIT FINDINGS

### Narrative:

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-audit, on-site audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The on-site portion of the PREA Audit at Finger Lakes Residential Center (FLRC) took place on June 7, 2021, and June 8, 2021, and covered the audit period of June 7, 2020, to June 7, 2021.

FLRC was last audited during the second PREA cycle on August 6 – 7, 2018 and was found to be in full compliance on August 31, 2018. Prior to the on-site visit, this auditor used the PREA Online Audit System (OAS) to review the Pre-Audit Questionnaire and the facility's documentation relating to the compliance of each of the 43 PREA Juvenile Standards. On April 19, 2021, this auditor received notification of an online Pre-Audit Questionnaire being completed. Each standard contained uploaded Office of Children and Family Services (OCFS) policies, protocols, and documentation which were relevant to that particular standard. After the pre-audit review of the Pre-Audit Questionnaire and supporting documentation, this auditor sent questions generated from those documents to the Agency PREA Coordinator. These questions were answered to the satisfaction of this auditor. The Agency PREA Coordinator was also courteous and provided additional information in an expeditious manner. The agenda for the on-site portion of this audit was reviewed with the Agency PREA Coordinator and agreed upon on May 28, 2021.

Notifications of the on-site portion of this audit were posted throughout the facility and accessible to staff, residents, and visitors on April 14, 2021. Photographs were taken of the various sites where the notifications had been posted and the photographs were emailed to this auditor noting their locations on April 15, 2021. All photographs of the notifications emailed to this auditor were date stamped. In addition, notifications of the on-site portion of this audit were also posted on the agency website. Email correspondence between this auditor and the Agency PREA Coordinator took place on a regular basis in the months leading up to the on-site portion of this audit to review the audit process and schedule, and to request any additional information that was needed to review.

Upon arriving at the facility on June 7, 2021, at approximately 8:00am, this auditor met with OCFS officials and administrative staff at FLRC, to discuss the audit schedule and review any questions or concerns anyone may have had about the on-site portion of the audit. The following officials were present:

- Facility Director
- Facility PREA Compliance Manager
- Agency PREA Representative
- Facility Assistant Director of Treatment
- Facility Assistant Director of Programs

This meeting was followed by a detailed tour of the facility which took approximately two hours. During the tour, this auditor noticed numerous PREA audit notices, an ample amount of video surveillance cameras (both inside and outside of the facility), and a wide variety of attractive zero-tolerance posters posted throughout the facility, including in the living units, programming areas, intake area, and visitation areas. The zero-tolerance posters were printed in both English and Spanish and contained both toll-free telephone numbers and addresses.

Following the tour, this auditor met with the administrative team to review the resident and staff rosters and the video surveillance system at the facility. This auditor then proceeded to interview the Facility Director, Facility PREA Compliance Manager, staff on shift, specialty staff on shift, and residents at the facility the rest of the day. Staff from Tour 3 (2:00pm to 10:00pm) were interviewed.

The second day of the audit was spent interviewing specialty staff, and staff from Tour 1 (10:00pm to 6:00am) and Tour 2 (6:00am to 2:00pm). This auditor also interviewed two members of the Sexual Abuse Incident Review Team, two administrative staff who complete Unannounced Rounds, two mental health staff, two medical staff, a staff who monitors retaliation, two Youth Counselor I's who administer risk assessments (Facility Classification Form), and intake staff. Due to the small size of the facility, several staff served multiple roles, including the Facility Director, Facility PREA Compliance Manager, and Youth Counselor I's. After these interviews were completed, this auditor reviewed ten resident's files for documentation verifying PREA education and risk assessments were completed as noted in the OCFS Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment Policy (PPM 3247.01). During the on-site portion of this audit, a Personnel staff was contacted, and staff training records were forwarded to this auditor, and it was confirmed all staff had successfully completed the annual PREA trainings/refreshers and had required background checks completed. It also should be noted; all medical staff and mental health staff completed an on-line specialty training specific to Medical Health and Behavioral Health in a Confinement Setting. These trainings were offered by the National Institute of Corrections (NIC). Training records were also reviewed by this auditor to confirm the completion of specialty trainings for all medical staff and mental health staff at FLRC. Interviews with these staff confirmed they receive the specialized training annually and understood the trainings they received.

10 of the 25 residents (40% of the population) residing at the facility were interviewed in a private and confidential area of the facility.

Residents from all living units were interviewed (four residents from Unit 3, three residents from Unit 5, and three residents from Unit 6). This auditor also interviewed one resident who had a cognitive disability, three residents who disclosed prior sexual victimization on the risk screening, and one resident who was limited English proficient (interviewed with an interpreter). There was no lesbian, gay, or bi-sexual residents, transgender/intersex residents, or any residents who made an allegation of sexual abuse during the past 12 months at the facility to interview during the on-site portion of this audit. Ages of the residents interviewed ranged from 13 years old to 18 years old. All the residents interviewed were familiar with PREA, understood how to report an incident of sexual abuse, sexual assault, or sexual harassment, and were aware of the services which were available to them at the facility (including outside resources). The residents interviewed stated they feel safe at FLRC and feel PREA is taken seriously at the facility. They also noted during interviews that they have been educated on a regular basis about PREA during their orientation and throughout their stay at the facility during PREA educational groups in their living units. Overall, interviewed residents were knowledgeable about PREA and could articulate multiple ways to report sexual abuse and sexual harassment, calling or writing an outside support organization, third party reporting, and anonymous reporting.

No residents had requested to speak with this auditor nor has this auditor received any written or email correspondence from any resident or staff at FLRC.

A total of 30 staff interviews took place (18 of the staff interviewed were Specialized Staff). These interviews included the following:

- Agency Head Designee
- Agency PREA Coordinator
- Facility Director/Superintendent
- Facility PREA Compliance Manager
- 2 Mental Health Staff
- 2 Medical Staff
- 2 Staff who conduct Risk Assessments
- 2 Intake Staff
- 2 Administrative Staff who Complete Unannounced Rounds
- 1 Person who Monitors Retaliation
- 2 Members of the Incident Review Team
- 1 Human Resources/Personnel Staff

In addition, this auditor also interviewed representatives from the following facilities/agencies via telephone:

- Representative from the Justice Center of New York (Conducts investigations at FLRC)
- Representative from Cayuga Medical Center (Conducts forensic examinations)
- Representative from the Tomkins County Advocacy Center (Provides advocacy services)

Randomly selected staff interviewed years of experience ranged from 8 months to 26 years. Seven staff interviewed were Youth Division Aide (YDA) III's, two staff were Youth Counselor I's, two staff were Youth Counselor II's, and one staff was a Transportation staff. All the staff interviewed were knowledgeable of PREA, the Zero Tolerance Policy, and reporting and responding to incidents and allegations of sexual abuse, assault, and harassment. All staff interviewed stated they are provided "PREA cards" and 7 of 12 staff were carrying them on their person. These "PREA cards" outline procedures and proper protocol for protecting residents from imminent sexual abuse and steps to take as a first responder. Staff interviewed were professional and enthusiastic about their work and PREA knowledge. Staff reported they have been trained to take all suspicions, knowledge, or reports of sexual abuse seriously regardless of how the information was received. Staff were all aware of their roles as mandated reporters and how to contact the Justice Center of New York Hotline to report allegations of sexual harassment and sexual abuse.

Unannounced Rounds are completed on a regular basis by upper-level administrative staff (Facility Director and Assistant Directors of Programs) at the facility. Logs of these Unannounced Rounds were reviewed by this auditor and met the standard. Shower room and restroom areas provide privacy during showers and when residents use the restrooms. Only one resident is permitted to use the restroom/shower room at a time. Female staff do not conduct showers and male staff position themselves to ensure residents do not leave the restroom or shower area without approval. Residents go to the shower area clothed and return to their bedrooms clothed. During interviews with residents and staff, it was confirmed that female staff announce their presence upon entering the living units by stating "female on the unit" and a note is placed in the logbook. This practice was observed by this auditor during the tour of the facility. It should be noted; there are signs posted outside of all living units that alert opposite gender staff to announce their presence upon entering the living units.

The PREA education program for residents begins at intake (the first hour the resident enters the facility) and is completed by an Intake Staff. Risk Assessments are completed by a Youth Counselor I at FLRC and is completed on the date of admission and minimum of every 30 days following the initial screening, documented on a Facility Classification Form, and stored in a database that is available to all members of the resident's treatment team and allows for a high level of fidelity regarding treatment plans and service needs during the resident's continuum of care. There were several residents who reported prior sexual victimization during the screening process currently residing at the facility. This auditor interviewed three residents who reported prior sexual abuse during the screening, and they stated they were referred to a mental health staff and medical practitioner immediately following their intake process. Upon admission, residents also

receive the OCFS Admission Handout "What you should know about Sexual Abuse/Harassment" and the Resident Handbook "Your Safety at OCFS DJJOY". These documents describe PREA in depth, including definitions of sexual abuse and sexual harassment, ways to report sexual abuse and sexual harassment, and agencies that are available to victims of sexual abuse and sexual harassment. Residents sign and date an acknowledgement form noting they received the above-mentioned PREA education and pamphlets.

Investigations regarding allegations of sexual abuse and sexual harassment are conducted by the Justice Center of New York. During the past 12 months, there has been five allegations of sexual harassment and three allegations of sexual abuse at FLRC (eight total PREA allegations). These allegations were immediately reported to the Justice Center of New York for investigation by the staff member(s) upon becoming aware of the incidents/allegations. The allegations were investigated by the Justice Center of New York and all five of the sexual harassment allegations were determined to be Substantiated and all three of the sexual abuse allegations were determined to be Unsubstantiated. During an open investigation, communication is maintained between the facility (Facility Director) and the Justice Center of New York via email, telephone calls, and facility visits. Upon learning of the determinations of the concluded investigations, the facility met with the residents to inform them of the determinations. Upon being informed of the determinations, the residents signed a "Determination of Notification to Youth" form which noted the determinations and the resident's signatures documented they were informed of the determinations. There were three PREA Sexual Abuse Incident Reviews at FLRC during the past 12 months. This auditor was provided copies of the PREA Sexual Abuse Incident Review reports to review and the Agency PREA Coordinator and Facility PREA Compliance Manager were able to describe the process in detail during their interviews. It was noted the PREA Sexual Abuse Incident Reviews were completed within 30 days of the facility learning of the Unsubstantiated determinations of sexual abuse and recommendations from the Justice Center of New York and the Incident Review Team were included in each report.

OCFS has developed thorough and detailed policies that address all the PREA standards related to Prevention Planning, Responsive Planning, Training and Education, Screening for the Risk of Sexual Victimization and Abusiveness, Official Response Following a Juvenile Report, Investigations, Discipline, Medical and Mental Health Care, and Data Collection. The depth and scope of the policies indicates the seriousness with which OCFS takes regarding sexual safety and their commitment to the PREA standards.

This auditor conducted an exit meeting with administrative team at FLRC following the on-site portion of this audit on June 8, 2021. During the exit meeting, this auditor shared the preliminary findings of the audit and thanked the administrative team at FLRC for their hospitality, hard work, and commitment to the full implementation of PREA in their facility.

## AUDIT FINDINGS

### **Facility Characteristics:**

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate or resident population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

FLRC is located approximately 7 miles north of the city of Ithaca, New York. The physical address of the facility is 250 Auburn Road, Lansing, New York, 14882. FLRC is a limited secure facility budgeted to house 72 residents. It is a New York state agency facility under the authority of the Office of Children and Family Services. Residents are housed in a one-story building with six living units, three of which are occupied by residents (Units 3, 5, and 6). The residents are currently being housed in Units 3, 5, and 6. Each housing unit is designed to house twelve residents. All living units contain twelve bedrooms, a day room, three restroom/shower rooms, two offices for Youth Counselors/Clinicians, and a laundry room. All living units are broken into pairs and separated by a "junction" or staff station between the living units. All resident's bedrooms are single living units and "dry rooms" (no toilets or sinks). Each living unit also connects to a self-contained classroom which can be used as program space evenings and weekends. In addition, each living unit opens to the main area of the facility which contains additional classrooms, vocational shops, a kitchen area, and central dining room. Outside of the facility is a garden area, baseball field, football field, and a track. There are basketball courts located outside of each living unit as well.

Units 3 and 6 are "Generic" units and Unit 5 houses the Sexually Harmful Behavior Program. The youth served at FLRC are male, adjudicated, juvenile delinquents, generally between the ages of 13 and 18 years old, placed by the New York State Family Courts. FLRC is accredited by the American Correctional Association (ACA).

On June 7, 2021, the resident population was 25 residents. The age range of the resident population ranged from age 13 to 18. In the previous 12 months, a total of 29 residents had been admitted into the facility. The average length of stay was seven months.

Entry and exit of the facility are controlled through one primary point, a sally port that is designated for pedestrian traffic, operated by staff in the facility Central Control Center. Entry is limited to authorized persons only. Each visitor is required to present identification, sign in, and pass through a metal detector upon entrance into the facility. Any keys a visitor may have on them upon entering the facility are given to a Central Control Center officer and returned upon exiting the facility. Any personal items a visitor may have on them are recommended to remain in their vehicle. Cellular phones are not permitted in the facility.

The 2021 FLRC Video Surveillance and Staffing Plan noted the facility is budgeted for 197 direct care staff. 105 of those positions are currently filled while 92 of those positions are vacant. There are no contractors or volunteers currently authorized to enter the facility due to the COVID-19 pandemic and protocols implemented to mitigate the spread of the virus. FLRC is equipped with 272 indoor video surveillance cameras and 52 outdoor video surveillance cameras (324 total video surveillance cameras). The video surveillance system can be monitored in the Central Control Room where there are ten monitors. In addition, the Facility Director and Assistant Directors of Programs also have access to the video surveillance cameras from their office computers. Video recordings from these devices remain on a secure server for approximately 30 days. Any video from a major incident is recorded and kept on a flash drive (including PREA allegations). This video surveillance system was installed on May 14, 2006 and was last upgraded on May 13, 2014.

The following services are offered to all residents at FLRC:

### **Counseling:**

Group counseling is conducted at least 5 days per week, using a variety of approaches, including:

1. Dialectical Behavioral Therapy
2. Sanctuary Psycho-Educational Groups
3. Substance Abuse/Innervisions
4. The "Seven Challenges" substance abuse pullout group

### **Education:**

FLRC provides educational programming for students according to New York State Education Department requirements. The Committee on Special Education (CSE) addresses special education needs for classified students and Individual Education Programs (IEP's) are developed for students with disabilities. State assessments including Regents examinations and competency tests are also provided to eligible students. Qualifying youth may also enroll in the Alternative High School Education Programs and pursue a Test Assessing Secondary Completion (TASC). Speech therapy is also available. Academic and vocational courses are offered so students can earn credits that can be applied toward a high school diploma upon a student's return to a community school. Students also complete a "portfolio" that provides a summary of relevant documentation and outlines work history, any certifications earned, and experiences gained.

### **Vocational Opportunities:**

1. On-the-job Training is a job-readiness program that allows designated residents the opportunity to practice the skills learned in their vocational classes. The program provides mentoring and job training, enabling residents to gain valuable work experience while earning a small stipend. Residents earn a certificate for their portfolio. The Summer Youth Employment Program offers opportunities in the facility, along with work in the community at Kings Cemetery and at Cayuga Medical Center.
2. National Work Readiness Credentials is a job-readiness class offered periodically throughout the year. Students are taught how to read business memos, inventory receipts, letters, and correspondence. They learn business math, including basic math computations and how to do mark-ups, mark-downs, and percentages. Situational judgement is a component of the course that puts youth in various scenarios where they are expected to respond appropriately and utilize active listening skills.
3. The culinary program trains youth to work in an entry-level position in a restaurant chain. Students can earn their SERV Safe Certificate. They leave with a beginner's skills in cooking for themselves and/or to continue on to advanced cooking classes.
4. The FLRC Horticulture Program prepares students for a "farm-to-table experience," during the summer and a landscaping and green house experience throughout the year. Students learn the basics of horticulture science in the propagation and cultivation of various vegetable and fruit plants as well as popular house plants. The horticulture shop will be offering "Management of Cool Seasons Lawns," as a nationally recognized certificate.
5. The Building Trades Program, run by a certified and highly skilled construction woodshop teacher, instructs students in the use of various tools and safety practices as they complete wood projects including bird houses, Adirondack chairs, and tables.
6. The Auto Repair Shop offers students training in the skills necessary for entry-level employment in the auto repair industry. Training includes an opportunity to earn the nationally recognized "Certified Alldata Information Specialist" certificate. The certified auto repair instructor focuses class activities primarily around routine and scheduled maintenance procedures. Students also have an opportunity to learn basic welding skills on a state-of-the-art virtual reality welding simulator.
7. The Cleaning Management Institute (CMI) presents students with study and hands-on practice in the chemistry of cleaning. Students learn to clean various floor surfaces and restrooms. Students who pass the course earn a nationally recognized certificate as a CMI custodial technician.
8. The Energy Warriors/Green Pathways program is a collaborative offering with the Cornell Cooperative Extension and is offered through the building trades shop. It prepares students to work in the energy conservation industry. Students leave with multiple certificates. Older students are offered a liaison working on their behalf between the skills learned in the program and actual employment in the community. Students have an opportunity to attend bi-annual weatherization "boot camp," held each spring and fall.
9. Careers & Financial Management is a course offered to help students learn to write resumes and cover letters, practice interviewing, and learn budgeting and the basics of finance. Portfolio development is part of this course, which involves the use of computer skills and programs. Included in the portfolio are essential documents such as working papers, birth certificate and social security card, when possible. Students are offered the opportunity, biannually, to earn certificates through American Red Cross First Aid/CPR and AED training and SHA 10 training.

**Health Services:**

Medical Care is provided seven days a week by a team of health practitioners. On-site dental services are offered by a dentist and dental hygienist.

**Mental Health Services:**

These are provided through the combined services of a psychologist, social workers, and a psychiatrist. Services include individual and group therapy, staff consultation and training, mediation therapy, and referrals for community follow-up and care upon release.

**Recreational:**

The recreation program is managed by recreation specialists and includes indoor and outdoor activities. Activities such as rock wall-climbing are also available on grounds.

**Religious Services:**

The regional OCFS chaplain offers religious services. Participation by residents is voluntary.

**Special Programs and Community Involvement:**

A community reintegration program is offered at the facility. This program provides care for residents who have had problems on aftercare and need special programming during a brief stay at the facility.

FLRC has many collaborative projects supported by connections through the center's Community Advisory Board, local businesses, colleges, universities, and volunteers.

**Permanency Planning:**

Permanency planning begins upon admission. Facility staff, in conjunction with the resident, the resident's family and Community Service Team workers, develop a release plan and identify community-based services to assist resident with their return to the community. Family engagement is actively pursued through video conferences, participation in support team meetings as well as facility sponsored visits to the

center.

FLRC has a signed Memorandum of Agreement (MOA) in place with Cayuga Medical Center (Ithaca, New York). It is noted in this MOA that Cayuga Medical Center will provide a forensic examination conducted by a Sexual Assault Nurse Examiner (SANE), collect, and maintain the integrity of evidence collected during the examination for law enforcement, and contact the Tomkins County Advocacy Center (Ithaca, New York) to send an advocate to the hospital to provide rape crisis counseling and advocacy services in the event of a sexual assault. Investigations at the facility are conducted exclusively by the Justice Center of New York.

FLRC's mission statement reads, "The Finger Lakes Residential Center will offer quality program services that are responsive to the needs of the client population and the community at large. These services will provide youth an opportunity to learn, grow and develop, in a safe, secure, and predictable environment. The Finger Lakes Residential Center will assist the youth in the acquisition of skills which, when applied, will better prepare them to meet the challenges of everyday life."

## AUDIT FINDINGS

### Summary of Audit Findings:

The OAS will automatically calculate the number of standards exceeded, number of standards met, and the number of standards not met based on the auditor's compliance determinations. If relevant, the auditor should provide the list of standards exceeded and/or the list of standards not met (e.g. Standards Exceeded: 115.xx, 115.xx..., Standards Not Met: 115.yy, 115.yy ). Auditor Note: In general, no standards should be found to be "Not Applicable" or "NA." A compliance determination must be made for each standard. In rare instances where an auditor determines that a standard is not applicable, the auditor should select "Meets Standard" and include a comprehensive discussion as to why the standard is not applicable to the facility being audited.

<b>Number of standards exceeded:</b>	3
<b>Number of standards met:</b>	40
<b>Number of standards not met:</b>	0

OCFS has implemented a zero-tolerance policy (OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment) which comprehensively addresses the agency's approach to preventing, detecting, and responding to all forms of sexual abuse and sexual harassment. This policy contains necessary definitions, sanctions, and descriptions of the agency strategies and responses to sexual abuse and sexual harassment and forms the foundation for the agency's training efforts with residents, staff, volunteers, and contractors.

The agency has designated a PREA Coordinator who reports directly to the Agency Head (Deputy Commissioner) and serves as the Bureau of Management and Program Support Director. The facility has a designed PREA Compliance Manager who reports directly to the Facility Director. Her official title is Assistant Director of Treatment. The Facility PREA Compliance Manager and Facility Director's interviews during the on-site portion of this audit demonstrated that FLRC is committed to the sexual safety of the residents residing at the facility. All staff and residents interviewed demonstrated they not only received but understand the education and training that was offered to them. Staff receive annual PREA trainings/refreshers and residents are educated at intake and during regular PREA education groups in the living units.

FLRC has a signed MOA with Cayuga Medical Center located in Ithaca, New York. This MOA states Cayuga Medical Center will have a SANE complete a forensic examination and will contact the Tompkins County Advocacy Center to provide an advocate to provide victim advocacy and emotional support in the event of an incident of sexual abuse. Cayuga Medical Center has an MOA with the Tompkins County Advocacy Center to provide advocacy services and to ensure sexual abuse victims receive rape crisis intervention services. Representatives from Cayuga Medical Center and the Tompkins County Advocacy Center were contacted by this auditor and were able to confirm the services noted in the MOA.

All investigations at FLRC are completed by the Justice Center of New York. This auditor was able to interview a representative from the Justice Center of New York on June 8, 2021. He was able to confirm the investigative process and follow up that occurs when his agency receives an allegation of abuse from FLRC. The Agency Head has formally asked the Justice Center of New York Executive Director to comply with PREA investigative standards in a formal letter dated June 8, 2021. In the past 12 months, there has been eight allegations of sexual harassment/sexual abuse (five allegations of sexual harassment and three allegations of sexual abuse) at FLRC. These allegations were immediately reported to the Justice Center of New York for investigation by the staff who received the allegation and were investigated. All five of the allegations of sexual harassment were determined to be Substantiated and all three of the allegations of sexual abuse were determined to be Unsubstantiated. Upon completion of these investigations, the Facility Director was notified of the determinations, in writing, by the Justice Center of New York. Upon learning of the determinations of the concluded investigations, the facility met with the residents to inform them of the determinations. Upon being informed of the determinations, the residents still residing at the facility signed a "Determination of Notification to Youth" form which noted the determination and the resident's signature documented they were informed of the determination. There were three PREA Sexual Abuse Incident Reviews at FLRC during the past 12 months that were completed. These PREA Sexual Abuse Incident Reviews were held within 30 days of the facility learning of the determinations. This auditor was provided copies of the PREA Sexual Abuse Incident Review reports to review and the Agency PREA Coordinator and Facility PREA Compliance Manager were able to describe the process (including recommendations) in detail during their interviews.

All residents admitted into the facility receive timely PREA education at intake. Intake Staff complete all PREA education during the intake process. The Facility Classification Form is completed by a Youth Counselor I within 72 hours of intake and each resident is reassessed every 30 days or more often if needed (examples given included the resident being involved in a major incident or a move to another living unit). All completed Facility Classification Forms are securely kept on a database and the only persons with access are Youth Counselors, Clinicians, and Administrative Staff. Any pertinent necessary information is recorded and communicated to staff for housing assignments or additional supervision to ensure the safety and security of all residents in the facility.

All employees at FLRC receive an initial training created by the National Institute of Corrections (PREA: Your Role in Responding to Sexual Abuse). Current employees who completed this training, receive refresher trainings annually (OCFS – PREA Policy Review) during years they do not receive the PREA training. These trainings/refreshers include 11 different topics required by the PREA standards:

1. Agency Zero Tolerance Policy
2. Fulfilling their responsibilities under agency sexual abuse and sexual harassment prevention, detecting, reporting, and response policies and procedures.
3. Residents right to be free from sexual abuse, assault, and harassment.
4. Right of residents and employees to be free from retaliation.
5. Dynamics of sexual abuse and sexual harassment in juvenile facilities.
6. Common reactions of juvenile victims of sexual abuse and harassment.
7. How to detect and respond to signs of threatened and actual sexual abuse and how to distinguish between consensual and sexual abuse between residents.
8. How to avoid inappropriate relationships with residents.
9. Effective and professional communication with residents including those who identify as lesbian, gay, transgender, and questioning (LGBTQ) or gender non-conforming.
10. Compliance with relevant laws related to mandatory reporting of sexual abuse.
11. Laws governing consent for OCFS youth.

Any volunteers and contractors who may have contact with residents have been trained on their responsibilities, the agency zero-tolerance policy regarding sexual abuse and sexual harassment, and how to report such allegations. The level and type of training is based on the services they provide and the level of contact they have with residents. Prior to entering the facility, volunteers and contractors are given a Sexual Misconduct Brochure and a Volunteer/Contractor Training and Acknowledgement Form to review and sign noting they understand the material in the brochure. There are currently no contractors or volunteers authorized to enter the facility. This is due to protocols implemented due to the COVID-19 pandemic.

All medical and mental health staff received the specialized training offered by the National Institute of Corrections (Medical Health Care Providers in Confinement Settings and Behavioral Health Care Providers in Confinement Settings) required by the PREA standards. In addition to the specialized training, medical and mental health staff also receive the PREA training/refresher that all staff in the facility are mandated to complete on an annual basis.

During the on-site portion of the audit, it was noted that posters are posted throughout the facility to educate both staff and residents on agency PREA policies. Brochures noting PREA requirements are given to all residents, staff, volunteers, and contractors. The agency also has PREA information for both residents and the public posted on its website.

This auditor was supplied with the following documentation to review prior to, during, and following the on-site portion of the audit:

## Standards

### Auditor Overall Determination Definitions

- Exceeds Standard  
(Substantially exceeds requirement of standard)
- Meets Standard  
(substantial compliance; complies in all material ways with the stand for the relevant review period)
- Does Not Meet Standard  
(requires corrective actions)

### Auditor Discussion Instructions

Auditor discussion, including the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

**Auditor Overall Determination:** Exceeds Standard

**Auditor Discussion**

(a) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “DJJOY must develop, implement and document a staffing plan that provides for adequate levels of staffing, and where applicable, video monitoring to protect youth against sexual abuse. OCFS 2167 Video Surveillance and Staffing Plan must be completed and submitted to the OCFS PREA Coordinator by January 31st of each year. In determining adequate staffing levels and the need for video monitoring, facilities must take into consideration:

1. Generally accepted juvenile detention and correctional/secure residential practices;
2. Any judicial findings of inadequacy;
3. Any findings of inadequacy from federal investigative agencies;
4. Any findings of inadequacy from internal or external oversight bodies;
5. All components of the facility’s physical plant (including “blind spots” and/or areas where staff or youth may be isolated);
6. Composition of the different populations within its facilities;
7. Number and placement of supervisory staff;
8. Programs occurring on each shift;
9. Relevant laws, regulations and standards;
10. Prevalence of substantiated and unsubstantiated incidents of sexual abuse; and
11. Minimum staff to youth ratios must be 1 to 8 during waking hours and 1 to 16 during sleeping hours. Any deviations from the plan due to limited and discrete exigent circumstances must be documented on the Video Surveillance and Staffing Plan (OCFS 2167). Only security staff must be included in these ratios.”

There were 25 residents residing at FLRC during the on-site portion of this audit. The average daily population at the facility during the past 12 months has been 30 residents.

The annual Video Surveillance and Staffing Plan at FLRC also addresses the facility staffing plan and requirements. This plan is reviewed on an annual basis and was reviewed and revised by the Facility Director on February 10, 2021. The facility is currently budgeted for 197 direct care staff; 105 of those positions are currently filled and 92 of those positions are currently vacant.

The facility is equipped with 324 video surveillance cameras (272 indoor cameras and 52 outdoor cameras). There are a total of 10 monitors in the Central Control Center which allows the cameras to be manned around the clock by a staff assigned to the Central Control Center. In addition, the Facility Director and Assistant Directors of Programs have access to the video surveillance system on their computers in their offices that can be viewed and/or reviewed at any point during the day. Video from all major incidents is reviewed by the Facility Director and retained on a flash drive. It was noted during an interview with the Facility Director that random video surveillance is reviewed on a weekly basis by the administrative team at FLRC. It was noted in the 2021 Video Surveillance and Staffing Plan that the video surveillance system was installed at the facility on May 14, 2006, and last upgraded on May 13, 2014.

(b) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “minimum staff to youth ratios must be 1 to 8 during waking hours and 1 to 16 during sleeping hours. Any deviations from the plan due to limited and discrete exigent circumstances must be documented on the Video Surveillance and Staffing Plan.”

The Facility Director reported that there have been no deviations from the staffing plan during the past 12 months. He also reported that in the event administrative staff at FLRC feel staffing ratios cannot be maintained during an upcoming Tour, staff would be held over and paid overtime to meet the ratios. Interviews with the Facility Director and Facility PREA Compliance Manager revealed that staffing is monitored shift to shift by the Administrator on Duty and that adjustments are made as needed to ensure the ratios are met. Staff schedules and resident rosters were also reviewed by this auditor to confirm compliance.

(c) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Minimum staff to youth ratios must be 1 to 8 during waking hours and 1 to 16 during sleeping hours. Any deviations from the plan due to limited and discrete exigent circumstances must be documented on the Video Surveillance and Staffing Plan (OCFS 2167). Only security staff must be included in these ratios.”

The FLRC Video Surveillance and Staffing Plan states the facility runs at a minimum 1:12 staff to resident ratio during Tour 1 (10:00pm to 6:00am) and at a minimum of 1:6 staff to resident ration during Tour 2 (6:00am to 2:00pm) and Tour 3 (2:00pm to 10:00pm). It was confirmed by this auditor after reviewing population reports for the past 12 months, staff schedules, and observations made during the tour of the facility that these ratios were being exceeded on a regular basis at the facility.

During the on-site portion of this audit, there were a total of 25 residents residing at the facility (nine residents in Unit 3, seven residents in Unit 5, and nine residents in Unit 6). It was noted during interviews with the Facility Director and Facility PREA Compliance Manager that Units 1, 2, and 4 are currently closed due to the low population at the facility.

(d) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Whenever necessary, but no less frequently than once a year in consultation with the OCFS PREA Coordinator, DJJOY facilities will assess, determine and document where adjustments are needed to:

1. The staffing plan;
2. Prevailing staffing patterns;
3. The facility’s deployment of video monitoring systems and other monitoring technologies;
4. Resources the facility has available to commit to adhere to its staffing plan and;
5. The OCFS 2167 Video Surveillance and Staffing Plan must be submitted to the OCFS PREA Coordinator by January 1st of each year on OCFS 2167.”

A review of the FLRC Video Surveillance and Staffing Plan confirmed this plan is reviewed on an annual basis and was reviewed and revised by the Facility Director on February 10, 2021.

(e) OCFS Policies 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment and 3247.40 – Administrative Coverage in OCFS Facilities state “Intermediate level or higher- level supervisors must conduct and document unannounced rounds to identify and deter staff sexual abuse and sexual harassment. Such unannounced rounds must be implemented for all shifts (day and night). Facility staff are prohibited from alerting other staff members that these supervisory rounds are occurring, unless these announcements are related to legitimate operational functions of the facility.”

A review of Unannounced Rounds Logs and staff interviews confirmed that Unannounced Rounds occur as required in this standard. Unannounced Rounds are completed by the Facility Director and Assistant Directors of Programs at FLRC. The Facility Director and an Assistant Directors of Programs who complete Unannounced Rounds were interviewed and they were able to discuss how they complete the rounds, assure minimum ratios are being met, and their inspections of the facility are completed. They both stated when completing Unannounced Rounds during sleeping hours, they obtain a radio from the Central Control Center, review video surveillance footage, and verbally notify the staff working in the Central Control Center not to notify any staff to ensure staff are not alerting each other that Unannounced Rounds are being conducted. In addition, both stated they also monitor radio transmissions and notify staff in the living units they visit not to notify other staff in the facility that Unannounced Rounds are being conducted. They both discussed how they make sure the rounds are random by selecting different times of the day/night and days of the week. This auditor was able to review the Unannounced Rounds Logs with the Facility Director, Facility PREA Compliance Manager, and Assistant Directors of Programs to confirm Unannounced Rounds are being completed a minimum of twice per month (once during waking hours and once during sleeping hours) during the past 12 months.

115.315	<b>Limits to cross-gender viewing and searches</b>
	<b>Auditor Overall Determination:</b> Meets Standard
	<p><b>Auditor Discussion</b></p> <p>(a) OCFS Policy 3247.18 – Contraband, Inspections, and Searches prohibits staff from conducting cross-gender strip searches or cross-gender pat searches except for thoroughly documented exigent circumstances. This policy states “Except in emergency situations, personal searches must be conducted by staff of the same gender as the youth being searched. Transgender youth may request staff of their identifying gender to conduct a strip or pat search. Whenever possible, this request must be accommodated, considering staffing and safety needs.”</p> <p>Staff and resident interviews supported that cross-gender strip searches and cross-gender pat searches are prohibited and do not occur at the facility. During interviews, staff could describe what an exigent circumstance would be. During the past 12 months, there have been no cross-gender strip searches or cross-gender visual body cavity searches of residents performed by medical staff or non-medical staff at FLRC.</p> <p>(b) OCFS Policy 3247.18 – Contraband, Inspections, and Searches states “Except in emergency situations, personal searches must be conducted by staff of the same gender as the youth being searched. Transgender youth may request staff of their identifying gender to conduct a strip or pat search. Whenever possible, this request must be accommodated, considering staffing and safety needs.”</p> <p>Interviews with residents, staff, medical staff, Facility Compliance Manager, and the Facility Director confirmed there have been no cross-gender pat searches of residents during the past 12 months at FLRC. Staff interviewed understood what an exigent circumstance would be and understand that this is the only time they would be permitted to conduct a cross-gender pat search.</p> <p>(c) OCFS Policy 3247.18 – Contraband, Inspections, and Searches states “All strip searches, radiological searches, body cavity searches, and non-routine pat searches must be entered in the unit and facility log. The record must include: justification for the search; name of the person authorizing the search; type of search; date and time of search; location of the search; name of each youth searched; name of the staff conducting the search; an itemization of any contraband found during the search; the disposition of any article(s) confiscated in the search; and any other significant information related to the search, including requests of gender-specific staff to conduct search of transgender youth.”</p> <p>Staff interviewed reported in the event they would have to conduct a cross-gender pat search, they would document the incident on an Activity Report (20-79 Form), notify the Administrator on Duty, and place a note in the logbook detailing the search performed on the resident. Staff and residents interviewed confirmed there have been no cross-gender pat searches conducted at FLRC during the past 12 months.</p> <p>(d) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Opposite gender viewing of youth under circumstances when breasts, buttocks or genitalia would normally be exposed (shower/hygiene time, performing bodily functions, and changing clothes) is prohibited. Each facility director must develop local operating procedures designed to prevent such viewing; such procedures must require that staff of the opposite gender announce their presence when entering the housing unit and any area where youth are likely to be showering, performing bodily functions, or changing clothing.”</p> <p>All residents and staff interviewed confirmed this policy is followed as only male staff are permitted to supervise showers/bathroom call. All residents shower in separate bathrooms with a privacy door. There are no cameras in the resident’s bedrooms or bathrooms. Female staff announce their presence upon entering the living units by stating “female on the unit” and noting their entrance into the living unit in the logbook. Log entries in the logbook and female staff announcing their presence in the living units were observed by this auditor during the tour of the facility. Signs are posted outside of the door of each living unit informing opposite gender staff to announce their presence upon entering the living unit. Interviews with staff and residents confirmed that female staff members announce their presence upon entering the living unit as required by announcing “female on the unit” and placing a note in the logbook.</p> <p>(e) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Searching or physically examining a transgender or intersex youth for the sole purpose of determining the youth’s genital status is prohibited.”</p> <p>Staff interviewed understood that they are prohibited from searching or physically examining a transgender or intersex resident for the sole purpose of determining the resident’s genital status. Staff interviewed stated that if a resident’s genital status is unknown, they would attempt to determine the genital status by having conversations with the resident, reviewing medical records, and reviewing the case history of the resident.</p> <p>According to the Pre-Audit Questionnaire, there were no cross-gender strip searches or cross-gender pat searches during</p>

the past 12 months. This was confirmed during an interview with the Facility Director, Facility Compliance Manager, staff, and residents during the on-site portion of this audit.

(f) The staff training curriculum "Conducting Comprehensive Searches" includes the searching of residents, including completing cross gender pat searches and searches of transgender and intersex residents in a professional and respectful manner. This training curriculum, as well as training logs, were reviewed by this auditor during the pre-audit portion of this audit. All staff are required to participate in and complete this training on an annual basis. Staff interviewed were able to describe this training to this auditor during interviews.

The Justice Center of New York then sends a notification to the facility. This system captures arrest records for all employees. This is completed during the intake process into the facility. They were able to describe reviewing the agency zero tolerance policy and reviewing and providing each resident with the OCFS PREA pamphlets “What you should know about Sexual Abuse/Harassment” and “Checking in for: Your Safety at OCFS DJJOY”. In addition to providing each resident with these pamphlets during intake, the intake staff explains each pamphlet to the resident and answers any questions they may have prior to the resident signing the acknowledgement form noting they received the education. This auditor reviewed ten resident’s files during the on-site portion of this audit and all ten resident’s files reviewed contained a signed copy of the acknowledgement form noting the resident received the PREA education per OCFS policies noted above.</p> <p data-bbox="240 1641 1485 1836">All residents interviewed confirmed they received comprehensive PREA education during their intake on their first day at the facility. They also acknowledged reviewing and receiving copies of the OCFS PREA pamphlets “What you should know about Sexual Abuse/Harassment” and “Checking in for: Your Safety at OCFS DJJOY.” In addition, residents interviewed stated they receive PREA Education groups in their living units on a monthly basis. Staff interviewed also noted these PREA Education groups are facilitated on a monthly basis in the living units to re-educate the residents on the importance of PREA and its role in the facility.</p> <p data-bbox="240 1865 1485 2130">(d) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “The required information must be communicated orally and in writing, in a language clearly understood by the youth during the admission process. Language assistance resources are available through the OCFS Public Information Office. Facilities must not rely upon youth interpreters, youth readers or other types of youth assistants except in limited circumstances where an extended delay in obtaining an effective interpreter could jeopardize a youth’s safety, the performance of first responder duties subject to section 115.364 of the PREA Juvenile Standards, or the investigation of the youth’s allegations. All education and information must be made available in formats accessible to all youth (limited English, deaf, visually impaired or otherwise disabled, as well as, limited reading skills).”</p>

Interviews with intake staff confirmed all PREA education information is communicated orally and in writing and in a language clearly understood by the resident, during the intake process. Language assistance resources are available through the OCFS Public Information Office. The facility also ensures that key information about PREA is continuously and readily available or visible through posters, the Resident Handbook, and PREA pamphlets "What you should know about Sexual Abuse/Harassment" and "Checking in for: Your Safety at OCFS DJJOY" in both English and Spanish. This auditor was able to confirm this material was available in both English and Spanish during the tour of the facility and by reviewing the Resident Handbook and PREA pamphlets that all residents receive.

There was one limited English proficient resident and one cognitively disabled resident residing at the facility during the on-site portion of this audit. These residents were interviewed by this auditor and confirmed all PREA educational materials were explained to them in a language they understood. The limited English proficient resident noted he received PREA education pamphlets that were printed in Spanish.

(e) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states "receipt of the above (PREA) education and information must be documented for each youth in the Juvenile Justice Information System (JJIS)."

All resident education is documented on an acknowledgement form specific to FLRC. This acknowledgement form is signed and dated by the resident upon receiving PREA education information and is also signed and dated by the Administrator on Duty. The signed acknowledgement form is kept in the resident's files. Noted on this acknowledgement form are ways to report sexual abuse, sexual harassment, and retaliation, a contact number for the Office of the Ombudsman, and confirmation copies of OCFS' PREA education pamphlets "What you should know about Sexual Abuse/Harassment" and "Checking in for: Your Safety at OCFS DJJOY" was received. This auditor was able to review ten resident's files and each file contained the above-mentioned documentation confirming the resident received PREA education during their intake on their first day at the facility.

(f) At intake, all residents receive OCFS PREA pamphlets titled "What you should know about Sexual Abuse/Harassment" and "Checking in for: Your Safety at OCFS DJJOY". These pamphlets include information about the agency's zero-tolerance policy and reporting information noting ways to report an allegation of sexual abuse or sexual harassment. In addition, there were visible posters (in both English and Spanish) in the hallways, all common areas, visiting areas, and in the living units of the facility that were viewed by this auditor during the tour of the facility. All residents interviewed stated they have been educated on PREA during their intake and on a regular basis during their stay at the facility through PREA Education groups. Each resident interviewed was knowledgeable of the PREA standards and their role in the facility.

the resident's placement was reassessed and reviewed during these meetings.

(f) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Transgender and intersex youth’s own views with respect to their own safety must be given serious consideration.”

There was one transgender resident admitted to FLRC during the past 12 months. It was noted during an interview with the Facility PREA Compliance Manager that this resident’s views with respect to safety were given serious consideration and were reassessed and reviewed during monthly Support Team Meetings. This auditor was unable to interview this resident because she was released from the facility prior to the on-site portion of this audit.

(g) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Transgender and intersex youth must be given the opportunity to shower separately from other youth.”

There was one transgender resident admitted to FLRC during the past 12 months. Interviews with the Facility Director and Facility PREA Compliance Manager confirmed this resident was given the opportunity to shower separately from the other residents. They both stated all residents in the facility shower separately as only one resident is permitted to use the restroom at time to shower. This auditor was able to observe the restrooms during the tour of the facility and noted all restrooms are single occupancy and only allow for one resident to use that area at a time. There are three restrooms in each living unit. In addition, staff and residents interviewed noted only one resident is permitted to use the restrooms at a time to shower.

(h) OCFS Policy 3247.15 – Room Confinement states “Room confinement shall be used only when a youth constitutes a serious and evident danger to him/herself or others. Room confinement shall be used only to provide for the immediate safety of the youth and/or others when no less restrictive intervention has been, or is likely to be, effective in averting danger. It is not to be considered, in and of itself, as a method or technique of treatment but rather as an interim measure to control and contain dangerous behavior.”

There were no residents at FLRC who were at risk of sexual victimization held in isolation during the past 12 months. The use of isolation is prohibited in all OCFS facilities. Therefore, there was no documentation for this auditor to review.

able to note ways they could report allegations of sexual harassment, sexual abuse, and retaliation to the Office of the Ombudsman or Justice Center of New York either in writing or by calling the toll-free telephone numbers listed in their Resident Handbook, pamphlets, and on posters posted throughout the facility. Staff interviewed also understood the ways a resident can privately report allegations of sexual harassment, sexual abuse, and retaliation.

(e) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “Each facility must provide a manner for staff to privately report sexual abuse and sexual harassment of youth.”

Interviews with staff confirmed they were aware that they are permitted to privately report allegations of sexual abuse and sexual harassment. All staff interviewed stated they could report the allegation to an administrative staff at the facility or by reporting the allegation to the Justice Center of New York via the toll-free hotline.

**Auditor Overall Determination:** Meets Standard

**Auditor Discussion**

(a) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Staff must attempt to make available a victim advocate from a rape crisis center and must document effort to provide rape crisis services.”

OCFS pamphlets “What you should know about Sexual Abuse/Harassment” and “Checking in for: Your Safety at OCFS DJJOY” contain telephone numbers and addresses for victim advocates from a rape crisis center. All residents receive a copy of these pamphlets at intake. In addition to residents receiving a copy of the above-mentioned pamphlets, there are numerous posters posted around the facility with telephone numbers and addresses to victim advocate services. This information is available in both English and Spanish and was reviewed by this auditor and noted during the tour of the facility. The Tompkins County Advocacy Center provides advocacy services and emotional support to any victims of sexual abuse at FLRC. This was confirmed during an interview with a representative from the Tompkins County Advocacy Center. In addition, the facility is working towards finalizing an agreement with the Tompkins County Advocacy Center to provide additional services to the residents at the facility. These services would include educational services at the facility from an advocate from the agency.

Interviews with residents confirmed they are educated and aware of the services that are available to them in the event they are a victim of sexual assault at FLRC.

(b) The majority of residents interviewed were aware of the services available to them in the event they are a victim of sexual abuse. Residents interviewed also stated they were educated that any correspondence with the Tompkins County Advocacy Center is confidential and private. In addition, the residents understood the responsibility of the victim advocate to report new information of sexual abuse to the authorities as they are mandated to report that information. Residents noted during interviews this information is provided to them during their intake and is noted in pamphlets they receive during their intake into the facility.

There were no residents residing at the facility who were victims of sexual abuse to interview during the on-site portion of this audit.

(c) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment states “Facilities must make efforts to establish a Memorandum of Agreement (MOA) with the medical facility. These efforts must be documented and part of the local operating procedure.”

FLRC has a verbal agreement in place with the Tompkins County Advocacy Center in accordance with this standard. The Facility PREA Compliance Manager and a representative from the Tompkins County Advocacy Center both described the services that are provided by the Tompkins County Advocacy Center. These services include, but are not limited to, providing advocacy services to any victims of sexual assault at FLRC. This auditor contacted a representative from the Tompkins County Advocacy Center, and she confirmed the services available to resident victims of sexual abuse. She also noted the Tompkins County Advocacy Center has an MOA in place with Cayuga Medical Center to provide advocacy services and emotional support to any victims of sexual abuse transported to the hospital. In addition, it is noted in the MOA FLRC has with Cayuga Medical Center, that the hospital will contact the Tompkins County Advocacy Center to send an advocate to the hospital in the event a resident is a victim of sexual abuse and is transported to the hospital.

(d) Visitation and contact with legal representation and family members is outlined in OCFS Policy 3422.00 – Resident Mail and OCFS Policy 3455.00 – Visits to Youth at DJJOY Facilities. FLRC provides residents with reasonable and confidential access to their attorneys and/or legal representation as well as parents or legal guardians. Attorneys can also visit whenever it is convenient for them, and these visits/conversations would be in private if requested by the resident or attorney. Interviews with residents confirmed any visits with their attorney would be in a private setting. Parents or legal guardians are permitted to visit on a weekly basis and residents also receive telephone calls to family members on a weekly basis. All residents interviewed stated they receive weekly telephone calls, daily incoming telephone calls, and weekly visits from their families (if the family is able to visit). It was noted on-site visits with family members have been suspended due to the current COVID-19 pandemic and safety protocols the agency has put in place at all OCFS facilities resulting from the pandemic. However, residents are able to receive virtual visits with their families at this time.

**Auditor Discussion**

(a) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “All OCFS employees, contractors, and volunteers are required to report knowledge of any alleged, threatened or actual violations of this policy to their supervisor, any on-duty employee above them in the chain of command, the on-call administrator (AOC) or the facility/program director. They also have the ability to privately report sexual abuse and sexual harassment of youths to the Justice Center. OCFS employees are mandated reporters and as such, must report incidents of sexual abuse and sexual harassment to the Justice Center. Failure to report may result in administrative, criminal or disciplinary sanctions appropriate to individual's status.”

All staff interviewed were aware that any knowledge, suspicion, or information regarding an incident of sexual abuse or sexual harassment or information regarding an incident of sexual abuse, sexual harassment, staff neglect, or any violation of responsibilities that may have contributed to an incident or retaliation must be reported to the Justice Center of New York for investigation as they are Mandated Reporters in the state of New York. All staff interviewed were aware that they must immediately contact the Administrator on Duty to report any information related to sexual abuse or sexual harassment and report the allegation to the Justice Center of New York. Staff also reported they could report any allegations of sexual abuse, sexual harassment, neglect, or retaliation privately by contacting an administrative staff and the Justice Center of New York.

(b) OCFS Policy 3456.00 – Reporting Familial Child Abuse and Maltreatment Pursuant to Article 19G of the Executive Law states “all OCFS employees and volunteers providing services to residents are mandated reporters. These persons are required to report to the Justice Center of New York whenever they have cause to suspect child abuse or maltreatment of a youth in a residential facility. The mandated reporter hotline is 1-800-635-1522. This policy also notes individuals making a report do not need to be certain a resident has been abused or maltreated, only a ‘reasonable cause to suspect’ abuse or maltreatment is necessary. When in doubt as to whether an incident could constitute child abuse or maltreatment, an employee must contact the Justice Center of New York. The Justice Center of New York will determine if the information meets the requirements to register a report for investigation.”

All staff interviewed were aware of their responsibility to report any allegations of sexual abuse or sexual harassment. The staff were able to describe their role as Mandated Reporters to this auditor during interviews and were aware of the Justice Center of New York hotline to report allegations of sexual abuse and sexual harassment.

(c) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment contains distinct prohibitions against sharing any information related to a sexual abuse report to anyone other than their direct supervisor, the Administrator on Duty, or the Justice Center of New York to whom they are reporting the allegation. The only acceptable disclosures are relative to investigative, treatment, and security decisions. In addition, this auditor was provided a copy of the Justice Center’s Code of Conduct for Custodians of People with Special Needs. This Code of Conduct reinforces prohibitions against sharing any information regarding clients to anyone besides their direct supervisor and the Justice Center of New York.

Interviews with staff (including Mental Health and Medical Staff) confirmed they are aware of their obligations to protect the confidentiality of the information they obtained from a report of sexual abuse. Staff interviewed reported this is reviewed during annual PREA trainings/refreshers.

(d) OCFS Policy 3456.00 – Reporting Familial Child Abuse and Maltreatment Pursuant to Article 19G of the Executive Law states “all OCFS employees and volunteers providing services to residents are mandated reporters.”

Mental health and medical staff interviewed indicated that disclosure is provided to residents regarding the limitation of confidentiality and their duty to report at the initiation of treatment services. In addition, these staff stated they are required to report any knowledge, suspicion, or information regarding any allegation of sexual abuse or sexual harassment to their direct supervisor immediately upon learning of the allegation. This information is also reported to the Justice Center of New York for investigation. Staff interviewed also discussed completing Mandated Reporter trainings on an annual basis and were able to discuss their role as Mandated Reporters during interviews.

(e) OCFS Policy 3247.00 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “All OCFS employees, contractors, and volunteers are required to report knowledge of any alleged, threatened or actual violations of this policy to their supervisor, any on-duty employee above them in the chain of command, the on-call administrator (AOC) or the facility/program director.” The Justice Center’s Code of Conduct for Custodians of People with Special Needs reinforces the staff’s responsibility to report any allegations of sexual abuse or sexual harassment to their direct supervisor as well as the Justice Center of New York.

All staff interviewed also stated that in addition to reporting the allegation to their direct supervisor or the Administrator on

Duty, they are also required to report the allegation to the Justice Center of New York and document the allegation/incident on an Activity Report (20-79 form).

(f) All allegations of sexual abuse, sexual harassment, neglect, and retaliation are reported to the Justice Center of New York for investigation. The Justice Center of New York will determine if the information meets the requirements to register a report for investigation.

It should be noted; all staff (including medical staff and mental health staff) are trained to treat third party reports the same as if they witnessed the incident themselves when receiving a report from a third party.

Interviews with the Facility Director, Facility PREA Compliance Manager, and staff (including mental health staff and medical staff) confirmed they are aware of how to report an allegation and were aware all allegations are investigated by the Justice Center of New York. The Facility Director and Facility PREA Compliance Manager were able to describe the reporting process as well as the investigative process once the allegation is referred to the Justice Center of New York.

There were eight allegations (five allegations of sexual harassment and three allegations of sexual abuse) made during the past 12 months at FLRC. These allegations were immediately reported to the Justice Center of New York by staff at the facility. Facility Reportable Incident Reports and Investigative Reports were reviewed by this auditor prior to and during the on-site portion of this audit to confirm the allegations were immediately reported to the Justice Center of New York for investigation.

In addition, such residents must be monitored, counseled, and provided appropriate treatment. The Justice Center's Code of Conduct for Custodians of People with Special Needs reinforces this policy.</p> <p>The Agency Head designee was interviewed regarding the protective action the agency takes when learning that a resident to subject to substantial risk of imminent sexual abuse. The Agency Head designee reported the agency would ensure steps are taken to remove the risk to the resident which could include separation of the resident from the potential abuser, either by transferring the resident to another OCFS facility or making a living unit change if the potential abuser is a staff working at the facility. The staff could also be removed from the living unit or placed on Administrative Leave pending an investigation. The Agency Head designee stressed the safety of the resident is the agency's utmost priority.</p> <p>Staff interviewed stated they would immediately separate the resident at risk from the potential abuser, increase supervision, call for additional staff assistance if needed, and report the incident to their direct supervisor or the Administrator on Duty. Their direct supervisor or Administrator on Duty would then determine the best course of action to ensure the safety of the resident.</p> <p>An interview with the Facility Director confirmed staff would be expected to act immediately to separate the resident at risk from the potential abuser. All OCFS facilities are to act promptly to remedy any form of retaliation.”</p> <p data-bbox="242 430 1469 490">The Assistant Director of Treatment/Facility PREA Compliance is the staff charged with monitoring retaliation at FLRC. She noted during an interview that she monitors both residents and staff at the facility.</p> <p data-bbox="242 521 1485 781">It was noted that FLRC employs multiple measures, such as housing unit changes or transfers for resident victims or abusers, removal of alleged staff or resident abusers from contact with victims, and emotional support services for residents or staff who fear retaliation for reporting sexual abuse or sexual harassment or for cooperating with investigations. Monitoring at the facility continues for at least 90 days following an allegation of sexual abuse or sexual harassment. Items that are monitored include any resident disciplinary reports, housing or programming changes, negative performance reviews, and reassignments of staff. The OCFS Home Office must conduct periodic status checks on the resident. It was also noted, the agency’s obligation to monitor must terminate should the Justice Center of New York deem the allegation Unfounded following an investigation.</p> <p data-bbox="242 813 1481 1207">An interview with the Assistant Director of Treatment/Facility PREA Compliance Manager indicated she serves as a retaliation monitor at the facility. She was educated on the signs of retaliation when interviewed and seemed sincere about monitoring retaliation at the facility. She stated the agency expects that actions would be taken immediately to ensure the resident was safe. It is the expectation of the agency that the resident would be monitored for at least 90 days or longer if deemed necessary at the conclusion of the initial 90-day monitoring period. She stated she monitors a resident by completing status checks for at least 90 days per policy. These status checks are made on a weekly basis during check ins with the resident and/or by reviewing documentation such as resident disciplinary reports, housing or programming changes, and discipline reports. She stated if the need would arise, she would continue to complete status checks on the resident for an additional 30 days (or longer), which may exceed the 90-day requirement noted in OCFS Policy 3247.01. Disciplinary action must be administered in a fair, impartial, and expeditious manner.</p> <p>During the past 12 months, there were no findings of guilt for resident-on-resident sexual abuse that occurred at FLRC.</p> <p>(b) OCFS Policy 3247.15 – Room Confinement notes segregated housing of residents to keep them safe from sexual misconduct is not used and is prohibited in all OCFS facilities. As a result, there were no incidents of isolation during the past 12 months at FLRC.</p> <p>There were no incidents of residents being placed in isolation as a disciplinary sanction for resident-on-resident sexual abuse during the past 12 months. This auditor was able to interview the Facility Director, Facility PREA Compliance Manager, and residents who all confirmed isolation is not used at FLRC.</p> <p>(c) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “The disciplinary process must consider whether developmental disability or mental illness contributed to a youth’s behavior when determining what type of sanction, if any, should be imposed.”</p> <p>Interviews with the Facility Director, Facility PREA Compliance Manager, and mental health staff at FLRC confirmed that a resident’s mental health is always considered when discipline is imposed for incidents of sexual abuse. In addition, the Facility PREA Compliance Manager stated the resident’s mental health diagnosis is reviewed and considered during Sexual Abuse Incident Reviews following a Substantiated or Unsubstantiated finding to ensure appropriate discipline was imposed. It was noted disciplinary sanctions include loss of level, loss of privileges in the program, and/or removal from the facility. If the allegations are criminal in nature, the Justice Center of New York would be responsible for filing charges.</p> <p>(d) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “Consideration must be given to providing the offending youth therapy, counseling, or other interventions designed to address and correct underlying reasons or motivations for the abuse. However, the facility may not require participation in such interventions as a condition of access to general programming or education.”</p> <p>Interviews with medical and mental health staff were conducted by this auditor during the on-site portion of this audit. In addition, during an interview with the Facility PREA Compliance Manager, she described the “False Allegation Alert” form that all residents sign upon admission into the facility. This form notes that residents will be held accountable for making allegations in bad faith. Consequences that are reviewed with the residents and noted on the “False Allegation Alert” form include:</p> <ol style="list-style-type: none"> <li>1. activity between youth is prohibited, however for such activity to constitute sexual abuse, there must be no assent to the activity, or it must be forcible or coerced.”

An interview with the Facility Director noted any suspicion of possible sexual abuse is reported to the Justice Center of New York immediately for investigation. In addition, during an interview with a representative from the Justice Center of New York, he stated that any behavior that is determined to be consensual in nature between residents is not investigated as sexual abuse.

(a) OCFS Policy 3243.18 – Initial Mental Health and Health Screening Interview for Facility Youth requires that residents at the facility who have disclosed any prior sexual victimization during a screening are offered a follow up meeting with a medical or mental health staff. If the screening indicates that a resident has experienced prior sexual victimization, whether it occurred in an institutional setting or in the community, staff ensure that the resident is offered a follow up meeting with a medical or mental health staff within 14 days of the intake screening. These assessments are documented in medical notes and in clinical case notes. The Assistant Directors of Treatment are the persons responsible for ensuring the resident receives a medical and/or mental health assessment.

During the past 12 months, there were several residents at FLRC who disclosed prior sexual victimization during their intake screenings. The residents were referred to medical and mental health staff for follow up meetings upon the completion of their initial Facility Classification Forms. This auditor interviewed medical and mental health staff during the on-site portion of the audit, and they confirmed the referral process once a resident discloses prior sexual victimization. This auditor was also able to review files of the residents who disclosed prior sexual victimization. These resident files contained documentation noting a medical and mental health staff followed up with the resident within 14 days of the intake screening. In addition, this auditor interviewed three residents who reported sexual victimization during their intake screenings. All three residents stated they were referred to medical and mental health staff within 24 hours of their initial screenings.

(b) OCFS Policy 3243.18 – Initial Mental Health and Health Screening Interview for Facility Youth requires that residents at the facility who have previously perpetrated sexual abuse are offered a follow up meeting with a medical or mental health staff within 14 days of the intake screening.

There were several residents admitted into FLRC during the past 12 months who previously perpetrated sexual abuse as the facility has a program (Sexually Harmful Behavior Unit) designed to treat residents who displayed sexually harmful behaviors either in their community or in previous facilities. This auditor was able to review resident files and noted there were Safety Plans developed which included increased supervision during waking hours and bedroom placement during the on-site portion of this audit. In addition, this auditor also interviewed two mental health staff who were able to confirm the referral process whenever it is noted a resident previously perpetrated sexual abuse during the intake screening. They stated the resident would be referred for an assessment immediately and would be seen within 24 hours by a Clinician for a mental health assessment and a Safety Plan would be developed and implemented. In addition, following the initial assessment, the resident may also be referred for a psychiatric or psychological evaluation to assist with developing treatment goals for the resident during his stay at the facility.

(c) OCFS Policy 3243.18 – Initial Mental Health and Health Screening Interview for Facility Youth notes any information from the Admission Screening Interview form related to sexual abuse, sexual victimization or abusiveness that occurred is limited to medical and mental health practitioners and other staff, as necessary, to implement treatment plans, security, and management decisions, including housing, bed, and program assignments.

Interviews with the Facility Director, medical staff, and mental health staff confirmed any information from the intake screening is limited to medical and mental practitioners, and members of the resident's treatment team. It was noted any information from the Facility Classification Form relayed to staff is done so only for safety and security reasons and this information is documented in a Safety Plan to ensure the safety of the resident(s). This auditor was able to review communication to staff to confirm information from the Facility Classification Form is for safety and security reasons only.

(d) During interviews with medical staff, mental health staff, and intake staff, it was noted they are mandated reporters in the State of New York and are required by law to report any information they receive from a resident relating to sexual abuse. All staff interviewed stated they inform the resident upon intake of their reporting duties.

(a) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “For all allegations of sexual abuse or where there has been penetration or contact between the mouth and penis, vulva or anus; or where there is an injury that may indicate penetration, or contact between the mouth and penis, vulva or anus, the victim will be immediately referred to the outside medical facility that was previously identified for clinical assessment and gathering of forensic evidence by professionals who are trained and experienced in the management of victims of sexual abuse. The outside medical facility’s trained examiner will make the final determination regarding evidence collection. Staff who can provide support to the victim must accompany the youth. In the event that a youth refuses to be examined at the medical facility, such refusal must be properly documented on the appropriate form(s). Facilities must make efforts to establish a Memorandum of Agreement (MOA) with the medical facility. These efforts must be documented and part of the local operating procedure.”

FLRC’s Local Operating Practice – Prevention, Detection, and Response to Sexual Abuse, Assault, or Harassment Policy (PPM 3247.01) requires for all allegations of sexual abuse, the victim will be immediately referred to Cayuga Medical Center to have a forensic examination completed by a Sexual Assault Nurse Examiner (SANE). The SANE will make the final determination regarding evidence collection. Staff who can support the victim shall accompany the resident.

FLRC has a Memorandum of Agreement in place with Cayuga Medical Center to have a forensic examination completed by a Sexual Assault Nurse Examiner (SANE) and to provide medical/mental health services at no cost to the victim. This MOA was provided to this auditor for review. In addition, this auditor contacted a representative from Cayuga Medical Center to confirm resident victims are referred to their facility and receive the services noted in the MOA.

There were no residents at FLRC who reported sexual abuse involving penetration during the past 12 months. Therefore, there were no residents referred to Cayuga Medical Center for a forensic examination.

(b) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “To preserve evidence, an allegation of rape or penetration requires that a youth not be allowed to engage in any activities such as hygiene, washing, bathing, showering, eating, drinking, brushing teeth, chewing gum, and eating or drinking (unless medically necessary). Youth should also be discouraged from urinating or defecating as that may destroy evidence prior to being presented at a hospital or clinic for the gathering of such evidence.”

All staff at FLRC are provided “PREA Cards” which note their responsibilities to protect the victim and to preserve evidence. 7 of the 12 staff interviewed during the on-site portion of this audit were carrying their PREA Cards on their person, displayed these cards to this auditor when prompted, and were able to describe their responsibilities if they are a first responder to an allegation of sexual abuse.

(c) OCFS Policy 3247.01 – Prevention, Detection, and Response to Sexual Abuse, Assault or Harassment states “Victims of sexual abuse are offered timely information about and timely access to emergency contraception and sexually transmitted infections prophylaxis, in accordance with professionally accepted standards of care, where medically appropriate.”

This auditor was able to interview two medical staff at FLRC who both stated any resident victim of sexual abuse would be offered information and timely access to emergency contraception and sexually transmitted diseases while at Cayuga Medical Center and during follow up appointments with medical staff at the facility.

There were no residents at FLRC who reported sexual abuse involving penetration that were referred to Cayuga Medical Center for a forensic examination during the past 12 months.

FLRC has a MOA with Cayuga Medical Center to provide medical/mental health services at no cost to the victim. Cayuga Medical Center has a MOA with the Tompkins County Advocacy Center to ensure sexual abuse victims receive rape crisis intervention services. In addition, the Tompkins County Advocacy Center will provide information/referral and follow-up services including accompaniment to law enforcement interviews and court. This was confirmed during an interview with a representative from the Tompkins County Advocacy Center.
