Question 1: Rate of Children Reported to CPS

Question: How many children are reported to CPS ? How many children were named as a confirmed victim in at least one indicated CPS report?

Answer: In 2018, for every 1,000 children statewide, 45.9 children were named as an alleged victim of abuse/maltreatment in at least one CPS report (Figure 1a). During 2018, 15.2 children out of every 1,000 children were named as a confirmed victim in 1 or more indicated CPS reports (Figure 1b).

Things to Consider:

- How do the rates shown in Figures 1a & 1b compare to each other? Is your county's substantiation rate significantly less than or close to the report rate? Why?

- How does your rate of preventive service authorized per child (Figure 2) compare to your rates of CPS involvement (Figures 1a & 1b)?

- Analysis Tip: This will differ from the counts in MAPS because this calculation is based on a count of children and not reports

* St Regis cannot be calculated because Woods Poole population projections are not available.
